## BIE Graduation Rate Data Mart

This tool is used to collect, validate and authenticate student graduation cohort data for federal reporting.

Users must begin by selecting the 'Snapshot' button to start the data capture process. Data from the snapshot is then built into a table where it can be extracted into a readable report by selecting the 'Report' button.

It is recommended this tool be used after the completion of the cohort year. Example: if the 19-20 year is complete, a snapshot is collected for the cohort class of '20.

### Snapshot

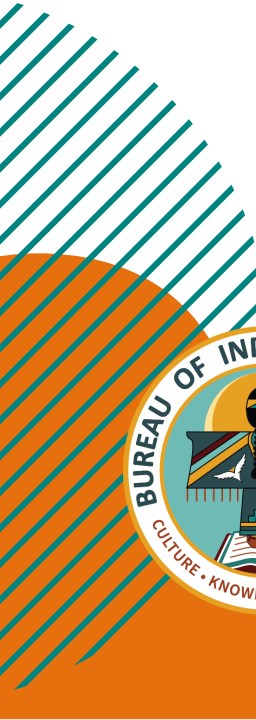

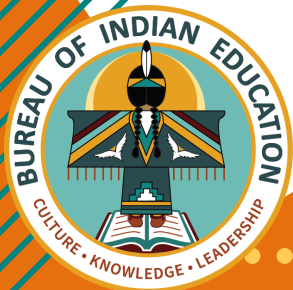

Captures a snapshot of student data for validation and authentication.

>

### Report

Print a report of the data gathered by the snapshot. This option is not available until after a snapshot is captured.
