Contact Name: Dr. Elizabeth Lahm, Director

Organization Type: Assistive Technology, Information Centers, State and Local Agencies

Disabilities Served: General / Non-disability Specific

The Mission of the Wisconsin Assistive Technology Initiative is to ensure that every child in Wisconsin who needs assistive technology (AT) will have equal and timely access to an appropriate evaluation and the provision and implementation of any needed AT devices and services. A primary goal is to improve the outcomes and results for children and youth with disabilities through the use of assistive technology to access school programs and curriculum.

Disabilities Served: General / Non-disability Specific

WisTech provides information on selecting, funding, installing and using assistive technology. WisTech coordinators provide assessments of individual needs. They also maintain a loan closet of assistive technology items that people can try out for themselves. Most services are provided free of charge.

WisLoan

The WisLoan program offers loans for assistive technology. The loans help people buy equipment such as hearing aids, modified vehicles, wheelchairs and ramps. Independent living centers throughout the state provide technical assistance, applications and assistive technology services.

The program is open to Wisconsin residents of all ages who have a disability. There are no income requirements, and individuals are not required to exhaust personal or public funding. Under the program, banks provide loans to qualified borrowers. Loan amounts depend on the item purchased and the ability to repay the loan.

The WisLoan fact sheet provides details about the program. For additional information, contact Patti Kraemer at 414/226-8306 or toll-free at 1-877/463-3778.

Independence*First* provides program information and statewide coordination. The Wisconsin Department of Health and Family Services administers the grant and provides oversight.
